Art Unit: 2135

DETAILED ACTION

1. Claims 1-29 have been examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 3. Claims 1-29 have been rejected under 35 U.S.C. 102(e) as being anticipated by Moses et al. (hereinafter refereed to as Moses) (US Patent No. 6,442,688 B1).
- 4. As per claims 1, 17 and 18, Moses teaches a system for detecting changes to conditions of electronic certificates, comprising:

a first computer system (i.e., a server) monitoring said electronic certificates to detect changes to conditions of said electronic certificates [column 3, lines 6-10 and column 5, lines 44-56]; and

a second computer (i.e., end user computers) system coupled to said first computer system [figure 1], said second computer system being notified by said first computer system of

Art Unit: 2135

changes in conditions of said electronic certificate [column 3, lines 7-14 and column 4, lines 54-58].

- 5. As per claim 2, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said first computer system includes a detecting module for monitoring changes to conditions of said electronic certificates and a notifying module for notifying said second computer system [column 5, lines 52-60 and column 6, lines 8-28].
- 6. As per claim 3, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said first computer system further includes a processor for executing said detecting module and notifying module [column 5, lines 52-60 and column 6, lines 8-28].
- 7. As per claims 4 and 10, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said second computer system (i.e., end user computers) includes a notification module [figure 2, unit 40, and column 5, lines 33-42].
- 8. As per claim 5, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said first computer system further includes a contracting module for negotiating a contract [column 3, lines 65-67 and column 4, lines 1-8].
- 9. As per claims 6-9, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said first computer system further includes an electronic certificate

Art Unit: 2135

server (i.e., a certificate authority, see figure 1 unit 24) for providing access to said electronic certificates [column 6, lines 13-21].

- 10. As per claims 11-14, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said second computer system is notified by said first computer system through a third computer system (i.e., where a third computer (an end-user) generates an update to its certificate to be transmit to the second computer (another end-user), where the server (first computer) is used as an intermediary for communication) [column 4, lines 47-59].
- 12. As per claims 15, 16, 28 and 29, Moses teaches the system as applied above. Furthermore, Moses teaches the system, wherein said first computer system is a first server and said second computer system is a second server [column 5, lines 22-24 and column 3, lines 60-65].
- 13. As per claim 19, Moses teaches the method as applied above. Furthermore, Moses teaches the method further comprising the step of creating an agreement between said first computer system and said second computer system defining which changes in conditions should trigger a notification [column 3, lines 60-67 and column 4, lines 1-22].
- 14. As per claim 20, Moses teaches the method as applied above. Furthermore, Moses teaches the method further comprising the step of recording said detected change in condition in said first computer system [column 4, lines 9-13].

Art Unit: 2135

15. As per claims 21-23, Moses teaches the method as applied above. Furthermore, Moses teaches the method, further comprising the step of determining whether said detected change of condition is of interest to said second computer system [column 4, lines 48-52].

16. As per claims 24-27, Moses teaches the method as applied above. Furthermore, Moses teaches the method, further comprising the step of determining a method of notification and a type of information to be relayed to said second computer system for said detected change to a condition of an electronic certificate [column 6, lines 27-42].

Conclusion

17. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO Form 892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beemnet W Dada whose telephone number is (703) 305-8895. The examiner can normally be reached on Monday - Friday (8:30 am - 6:00 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Y Vu can be reached on (703) 305-4393. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
